Wen

Frontend Engineer / React / TypeScript / Build Tooling

Hangzhou, China • wen@example.com • github.com/wen

SUMMARY

5 years building data-heavy web products. Focus on component architecture,
build performance and accessibility. Comfortable owning a feature end to end.

EXPERIENCE

Senior Frontend Engineer • Xingtu Data • 2022.07 - Present

- Abstracted 12 duplicated data tables into a config-driven component; new dashboards ship in 2 hours instead of 2 days.
- Cut first-load JS from 1.2 MB to 380 KB and LCP from 4.1s to 1.7s.
- Built the shared component library and docs site used by 20+ engineers.

Frontend Engineer • Yunfan Tech • 2020.03 - 2022.06

- Implemented a JSON Schema driven form engine covering 60+ internal forms.
- Migrated releases from manual FTP to GitHub Actions: 20 min to 3 min.

SELECTED PROJECTS

DevFolio - static portfolio driven entirely by config files and Markdown.
md-press - zero-runtime Markdown documentation generator, published on npm.

SKILLS

React, TypeScript, Vite, TailwindCSS, Node.js, PostgreSQL, Playwright, Figma

EDUCATION

B.Eng. in Computer Science • Zhejiang University of Technology • 2016 - 2020
